LESS® Triage Pocket™

Four categories reflective bands

LESS® Triage Pocket is a functional bag that attaches with a strap around the waist. The pocket contains 10 reflective tapes of each four categories of red [IMMEDIATE], yellow [URGENT], green [DELAYED] and grey [no signs of life]. The reflective tapes are very effective and easy to use for identification of patient priority. The system is designed for first phase triage in major accidents, and works well together with all major triage algorithms.

Contains 10 pcs reflective bands of each category. Part of LESS Evacuation System.

LESS® Triagemappe Triage Pocket can be supplied in any language, subject to a minimum quantity. Available in orange, black, and camo.
