

Hydrogel plaster – 43 x 68mm Art. 9301

Detectaplast®

Detectable blue hydrogel plasters for professional users in the food industry, catering industry and industrial kitchens. These plasters are waterproof and elastic and meet the applicable HACCP standards.

The Detectaplast® Hydrogel plaster is suitable for cuts and abrasions. The hydrogel contains 60% water, absorbs wound fluid and has a mild cooling effect which relieves pain. The combination of hydrogel, wound fluid and a lack of oxygen creates a moist wound environment which accelerates regeneration of the skin in the wound (angiogenesis).

- ✓ plaster for cuts and abrasions as well as for chronic wounds that do not heal well
- ✓ suitable for the treatment of overheated skin
- ✓ slight cooling effect relieves pain
- ✓ creates a moist environment for quicker healing
- ✓ the PU film allows the wound to breathe and protects against bacteria, viruses and water
- ✓ allows free passage of gases and moisture vapour, protecting skin against maceration
- ✓ strong hypo-allergenic adhesive
- ✓ does not stick to the wound
- ✓ detectable visually and magnetically (meets HACCP, BRC and IFS standards)
- ✓ specially made for the food industry and the catering industry
- ✓ latex free
- ✓ should not be used on infected wounds or on third-degree burns

Packaging: 10pcs/zipper
